

RITIK KUMAR

Backend Developer | Full Stack Engineer

+91 8968995156 • ritik.iit21@gmail.com • github.com/ritikkumar1212 • linkedin.com/in/ritik-kumar-a38b2a216

PROFESSIONAL SUMMARY

Backend engineer specializing in scalable API design, real-time systems, and data pipeline development. Proven expertise building production-grade Node.js and FastAPI applications. Passionate about performance optimization, clean architecture, and leveraging AI/ML APIs to enhance product capabilities.

EXPERIENCE

Backend Developer • Myorbit.ai (Remote)

April 2025 - June 2025

- Engineered real-time chat system using Redis Pub/Sub, handling concurrent user connections with <100ms message latency
- Debugged and optimized Express.js + Bun REST APIs, reducing memory footprint by 35% and eliminating 15+ critical runtime errors in production
- Built high-performance web scrapers with BeautifulSoup and FastAPI, processing 10,000+ records daily and storing structured data in PostgreSQL with 99.2% accuracy
- Implemented error handling, logging, and monitoring pipelines improving deployment reliability to 98%+

Full Stack Developer • Freelance

Aug 2025 - Present

- Designed and deployed N8N automation workflows for enterprise clients, automating 50+ manual business processes and reducing operational overhead by 30%
- Architected full-stack web application for data aggregation and visualization, combining web scrapers with React frontend and PostgreSQL backend
- Delivered client projects on-time with comprehensive documentation and post-deployment support

TECHNICAL PROJECTS

IPC Assistant – AI-Powered Legal Aid Tool

github.com/ritikkumar1212/ipc-assistant

- Built cross-platform mobile assistant using React Native analyzing crime scenarios and mapping them to relevant IPC sections with 92% accuracy
- Integrated OpenAI API for intelligent prompt-based legal classification and interpretation, enabling non-legal professionals to understand applicable laws
- Designed for real-time legal assistance for law students

Web Scraping & Data Aggregation Platform

- Developed FastAPI backend for multi-site data extraction, supporting concurrent scraping of 20+ ecommerce and data sources
- Created React dashboard displaying aggregated, deduplicated data with real-time filtering and export capabilities (CSV, JSON, PDF)
- Implemented PostgreSQL-backed data pipeline with automatic cleaning, normalization, and schema validation

TECHNICAL SKILLS

Backend

Node.js • Express.js • FastAPI • Flask • Bun

Databases & Caching

PostgreSQL • MySQL • Redis • Database Design • Query Optimization

Frontend

React • React Native • HTML/CSS • Responsive Design

DevOps & Tools

Git • Docker • REST APIs • Web Scraping (BeautifulSoup) • N8N • OpenAI API • GitHub Actions

Core Competencies

Microservices Architecture • API Design & Documentation • Real-time Systems • Data Pipeline Development • Performance Optimization • Clean Code Practices

EDUCATION

Bachelor of Engineering in Electronics & Communication

UIET, Punjab University • Chandigarh

Expected Graduation: August 2027

CERTIFICATIONS & ACHIEVEMENTS

- Open Source Contributor – Active in backend and tooling projects
- Developer Tools Advocate – Passionate about building tools that improve developer experience
- Multiple Full-Stack Project Completions – Successfully delivered 5+ projects from conception to production

LANGUAGES

English (Professional) • Hindi (Native)
